

ID730 MODELLING USER EXPERIENCES

The Method Matrix Workshop

HOW TO CHOOSE METHODS? - QUESTIONS

HOW TO CHOOSE METHODS? - CRITERIA

	Categorisation Criteria	Categories			Source
WHY? What is the purpose of the research?	Phases of the design process	Research need identification	User insight generation	Idea evaluation	
		Generative	Evaluative		(Stappers & Sanders, 2005)
		Formative	Summative		(Rosson & Carroll, 2002)
		Discovery	Definition	Evaluation	(Squires, 2002)
		Front-End Analysis	Testing and Evaluation		(Wickens, Gordon, & Liu, 2004)
HOW? Which approaches will be adopted by the researcher while conducting the research?	Type of research activity based on the focal problem	Clinical	Applied	Basic	(Buchanan, 2007)
		Experimental	Empirical	Theoretical	(Strickler, 1999)
	Theoretical approach in the area	Reductive		Holistic	(Blythe, Hassenzahl, Law, & Vermeeren, 2007)
		Measurement models		Structural models	(Law & van Schaik, 2010)
	Origins of methods	Traditional	Adaptive	Innovative	(Hanington, 2003)
	Participation degree of the user	Consultative	Representative	Consensus	(Carmel, Whitaker, & George, 1993)
WHAT TYPE OF INFORMATION? What kinds of data will be gathered through research?	Characteristics of the user information	What people say / think	What people do / use	What people know / feel / imagine	(Sanders, 2002)
		Altitudinal	Behavioural		(Rohrer, 2014)
		Conceptual	Procedural		(Melican, 2000)
	Type of data	Qualitative		Quantitative	
WHEN? What will be the time frame for the research?	Time – duration of the study	Longitudinal		Cross sectional	(Ruspini, 2002; Flick, 2007)
WHERE? Which contexts are appropriate for conducting the research?	Research setting	Naturalistic		Contrived	

HOW TO CHOOSE METHODS? - CRITERIA

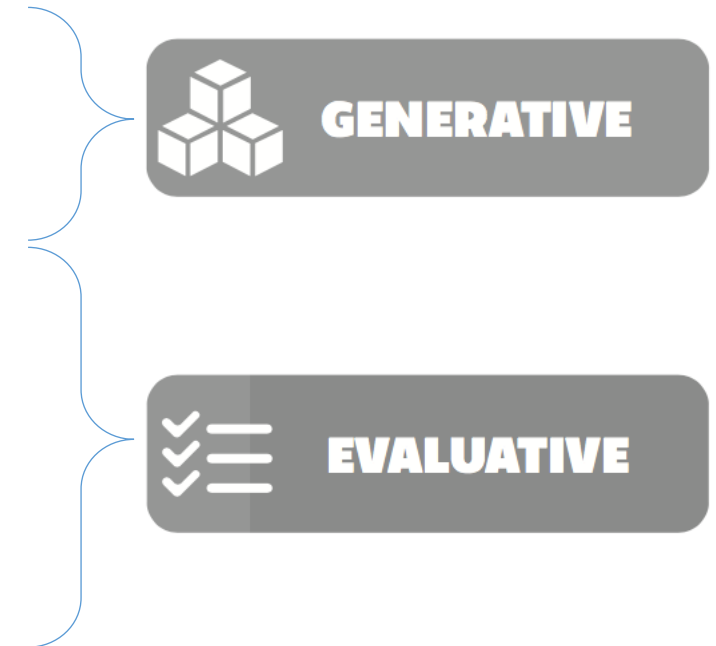

METHOD SELECTION QUESTIONS	CATEGORIZATION CRITERIA	CATEGORIES		
WHY? What is the purpose of the research?	Categorization according to the phases of the design process	 GENERATIVE	 EVALUATIVE	
HOW? Which approaches will be adopted by the researcher?	Categorization according to the way of application	 DIRECT	 INDIRECT	
WHAT? What kinds of data will be gathered through research?	Categorization according to characteristics of the user information	 ATTIT.	 BEHAV.	 IMAG.
WHEN? What will be the time frame for the research?	Categorization according to time / duration of the study	 CROSS-SECTIONAL		 LONGITUDINAL
WHERE? Which contexts are appropriate for conducting the research?	Categorization according to the research setting	 CONTRIVED		 NATURALISTIC

Survey Methods											
Interview Methods											
Observational Methods											
Diary Methods											
Workshop Methods											
Expert Evaluaton Methods											

WHY? - What is the purpose of the research?

- Are you trying to generate knowledge to develop a new (non-existent) product?
- Are there any products or services to evaluate to generate insights related to the experience?
- Are you trying to understand which products or services experienced better by the user?

WHAT? - What kinds of data will be gathered through research?

- Are you looking for information on how users interact with a certain product or service?
- Are you looking for information on users' habits and actions?
- Are you looking for information on users' concerns about a certain experience?
- Are you trying to understand users' perceptions about a certain product or experience?
- Are you trying to understand what users' wishes and dreams beyond what they can say about their current experiences?

HOW? - Which approaches will be adopted by the researcher?

- Is this a sensitive setting?
- Will it be a public setting where it would be difficult to inform users that they are being observed? Will it be intrusive to inform them?
- Will it be important not to restrict the user's imagination?
- Otherwise

WHERE ? - Which contexts are appropriate for conducting the research?

- Is it important to observe the experience as close to the reality as possible?
- Do you need to collect information about the context of use?
- Is it important to eliminate outside intruders while you are collecting the information?

Class Activity

- 1 hour Please identify each method used in your papers and locate each paper in the method matrix by considering the analysis table you prepared for Assignment 2

Consider the questions and criteria for choosing the methods and mark the relevant criteria for the method(s) chosen by each paper
- 10 mins Discussion on the results of the workshop
