

TITLE OF THE RESEARCH PROJECT

Student Name 1, Student Name 2

Abstract

Summarise your study: introduce the problem background and goals for inquiry, present a mini overview of the methods you and techniques you utilised in your inquiry (you may give references and examples from the literature of how and for what purpose these methods are used), and very briefly summarise your procedure and findings. Keep it short and simple (apprx. 250-300 words). A good abstract aims to prepare the audience and help make sense of the steps of the presented research by setting the context. If you need to provide a references, add the bibliography at the end of the poster. This draft is simply for content reference and you may manipulate the design according to your needs.

If you need to provide a references, add the bibliography at the end of the poster. This draft is simply for content reference and you may manipulate the design according to your needs.

Study 1

For each study, you should present your methodology and key findings. Methodology should include the sample, materials, scales, data collection procedure, etc. While presenting the methodology and findings, use of tables, figures, graphs or images is advised.

Please note that all the tables and images used in this draft are hypothetical examples and may not reflect the type of data representation we expect from you.

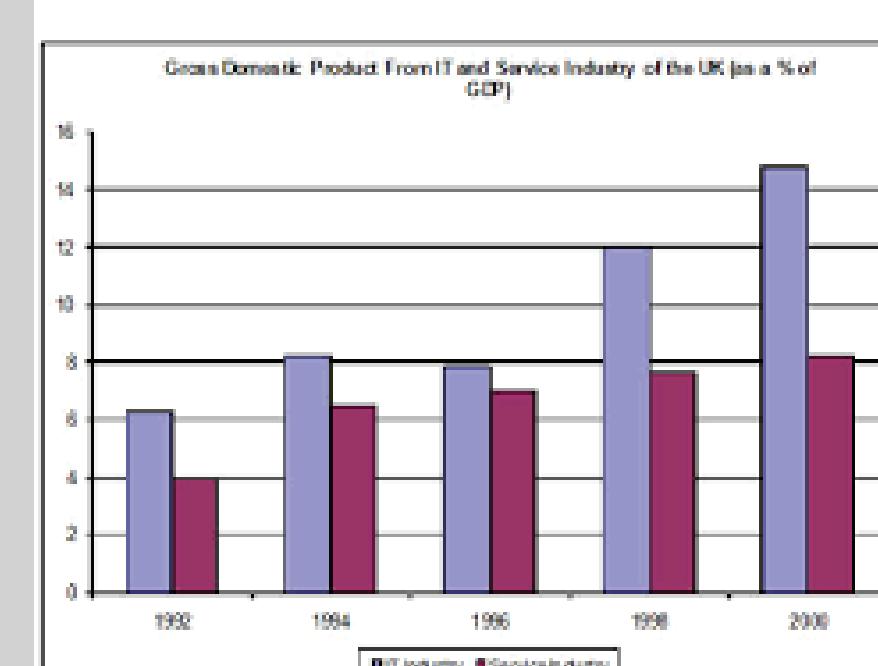

Table Caption

Subsection title

You can divide this section into subsections to better organise the content. Sample subtitles might be reserved to separate methodology, procedure, findings, etc.

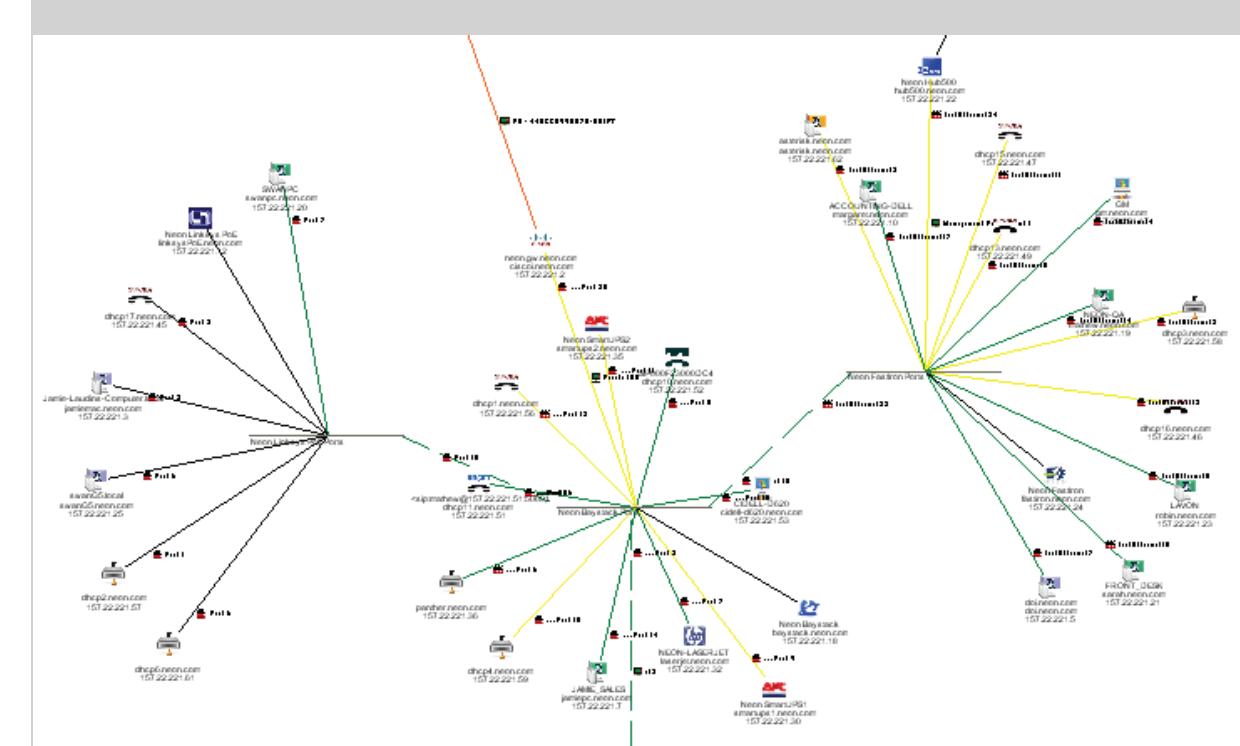

Figure Caption

Please note that all the tables and images used in this draft are hypothetical examples and may not reflect the type of data representation we expect from you.

Reflections/Conclusions/Discussions

This section should include methodological reflections on and comparisons of the two different methods/techniques you employed in your research. Please keep in mind that the focus of your discussions should be methodological. You may base your conclusions on data collection procedure as well as the analysis and findings of your research. If necessary, you may as well use graphs or tables in this section.

References

Please select a standard referencing style (i.e. APA, Chicago...) and be consistent. Keep in mind that this sub-section is optional in case you have in-text references at any point of the poster.
